MEMORANDUM FOR: D/Consolidated SAFE Program Office

FROM: Edward J. Maloney
Director of Information Technology

SUBJECT: SAFE Funding

1. As you and I have discussed, there is considerable concern now that we have begun the new fiscal year over how to meet what will clearly be a funding shortfall for the SAFE Program. The diverse positions of the two agencies suggest that early resolution to the differences will not be forthcoming. In addition, the lackluster recommendations contained in the recent IC Staff report on SAFE suggest that someone take some action now.

2. Therefore, you are instructed to begin immediately a replanning activity that will bring CSPO in line with the present funding profile. I would expect that replanning activity to be completed and your actions taken within a week. You should also be advised and likewise advise your vendors that, in the event Gramm-Rudman is invoked, significant additional reductions are likely. Please provide me a status on your actions by COB 28 October.

Edward J. Maloney
